

ELF.online is a human resource management, ordering, dispatch, payroll and billing system for the temporary labour supply industry.

### Custom

ELF.online is a custom product for the temporary labour supply & work placement industry. Its features were created specifically for this industry, including high volume daily pay ("Work today, get paid today") operations that most generic payroll systems have difficulty handling.

ELF.online's features provide you with the tools to increase your customer's satisfaction and retain your temporary labour workforce resources. Prompt and accurate customer billing; resource allocation tools to match your temporary labour skill sets with your customer's needs; flexible, reliable, and efficient payroll payment methods for your employees; these are only a few of the ELF.online features that will help you manage your business and allow you to focus on its success and growth.

### Reduce Costs & Increase Revenues

ELF.online streamlines your ordering, dispatch, payroll and invoicing processes, reducing administrative time and costs, and enabling increased volumes and revenues. Eliminate costly cheques as your primary method of payroll payments by implementing electronic payments, even to your un-banked employees - with our PayCode® in-branch ATM cash payroll payments!

### No Software

ELF.online requires no software installation. It is an on-line hosted web application allowing for rapid deployment to large numbers of users in multiple branch locations, over secure SSL/TLS encrypted connections. With no need to install any software on your client PC, there's no worry about keeping your payroll software updated for changing government payroll regulations - you'll always have access to the most up-to-date version of our software on our fully hosted servers.

### Proven

Middle Earth Technologies Ltd. has been providing solutions to the temporary labour industry since 2002. The ELF.online product was launched in 2005 and is now used by some of the largest multi-location temporary labour businesses in Canada, as well as many smaller single-branch operations.

*"The ELF system is a one-stop solution that works for our business because it is customized to the temporary labour industry...they act as a partner and listen to the ongoing needs of our business."*

Justin Fraser, President, Trades Labour Corporation
